

HEAVY INDUSTRIAL

BENDING

STEEL TO OUR WILL

FOR OVER **100 YEARS**

Clarage has invested **MILLIONS** into a new state-of-the-art manufacturing facility

HEAVY INDUSTRIAL

The Problem:

Standard Fans are low cost but they are not the best choice.
One size fits all....ya right!!

The Solution:

Custom designed fans are tailored to your process and designed for the maximum point of efficiency where your process will use the fan. The perfect combination of modern production and state of the art proprietary design and configuration tools means that we will deliver a custom fan to your specifications on time and at a competitive cost. Clarage's custom approach designs the perfect fan for your process minimizing power consumption and life cycle costs. While others try to stretch standard fans to fit, Clarage custom tailors to solve your needs.

For custom process fans for boilers, pollution control, biomass, manufacturing, and automotive you can trust the fan tailors at Clarage to deliver a fan that fits.

One size simply does not fit all.

OVER 100 YEARS OF BEING TOUGH, CUSTOM AND PROVEN
